

DIRECTIONS: *Shake well before each use.* Apply generously to animal or person wherever skin is exposed to sun (ears, nose, muzzle, pink skin areas, etc.) anytime for instant insect and sun protection. Color of product may vary.

WARNING: Avoid eyes and mucous membranes. For external use only. If irritation develops discontinue use. Results may vary from pet to pet.

This moisturizing sunscreen is PABA free and non-greasy. It has been formulated with titanium dioxide sunscreen (a physical sun blocker), as well as essential oils to ward off pesky insects. Titanium dioxide is resistant to discoloration under UV light, which enhances its stability and ability to protect skin from UV light. This product offers excellent protection against harmful UVA/UVB and infrared rays to help prevent sunburn or potential photo damage. Continued use may help reduce the risk of some skin cancer.

Results may vary from pet to pet.
